Dear Dr. Rothenberg:

Yes, of course I recall our discourse and I would be happy to have an opportunity to continue the conversation. As you would agree, the optimization of the setting for scientific creativity will be one of my principal tasks. If you have published any thing more since 1974 on the same subject, I would be grateful for the opportunity to see it.

As I am sure you have discovered, you could not have found a more able person than Rodney Nichols, and you can imagine how gratified I was to find the kind of role he plays at The University.

Yours sincerely,

JL:ek-f
